60-65	SUSTAINABILITY

STUDIOSCAPE

STUDIOSCAPE

STUDIOSCAPE

The Studioscape range is designed to encourage collaboration and community in the workplace, education and leisure environments.

Studioscape is a modular system of seating, tables, planters and power/data units. By bringing people and plants together in the same system, the Studioscape range is a great tool to create dynamic spaces that can positively impact well-being.

Two seating heights and three table heights are available within the Studioscape range. All are cross-compatible making for a wide range of space-planning options and an easy reconfiguration.

Lounge

380
high

The lounge seating has a webbed suspension which means it is firm but resilient. Suitable for informal meetings and flexible working.

**Dining/Meeting
+ Booth**

450
high

The dining/meeting module is more firm and has a higher seat and back for support. It is an ideal alternative to banquettes and booths.

Planters

690/920
high

There are two plants per 750-grid square. These are planted in individual liners which can be easily exchanged or replaced as the plants grow.

**Screens
+ Stools**

1250/450
high

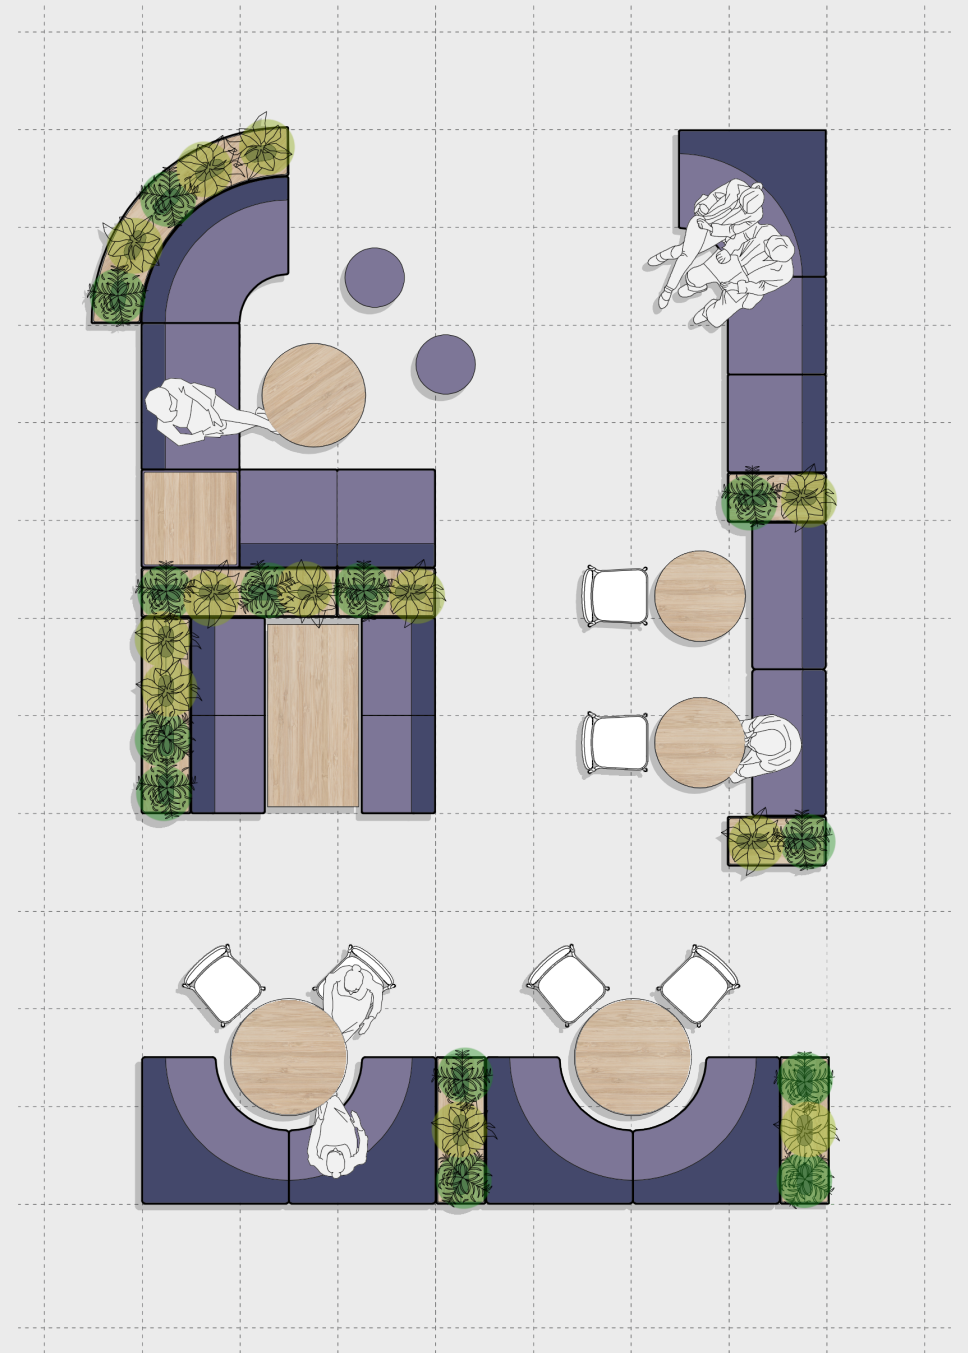

Screened seating elements in straights and curves allow visual and acoustic separation. The screens can make up booths or divide up spaces.

Flexible now and into the future

The 750x750 grid relates well to the human scale - it provides a comfortable blueprint for social spacing without compromising on intimacy and promotes effective use of space. This important standardisation means that all the elements are cross-compatible, now and into the future.

As needs change, so can your layout without compromise. Add elements at a later date or remove and relocate. Modularity is also great for access and delivery. In the future, if you need to repair an element, it is easier to remove one item than a whole installation.

Our motivation to bring living plants into the workplace is to enable people to experience a healthier environment.

As mobile and flexible as the seating - planters can demarcate settings and integrate plants with people. Our tried and tested system separates the upholstered elements with a waterproof surface at the point of contact when watering.

We provide plants through our plant specialist. They are already potted in a plastic liner which includes self-watering system. The liners are modular, so it is as easy to mix and match the plants as it is with the furniture.

There is no need to worry about any drips from watering as each planter has a top made of compact grade laminate in six standard finishes.

(Black, dark grey, light grey, white, Oak + Walnut)

F2253 Diamond Black
RAL (9005)

F7912 Storm Dark Grey
RAL (7016)

F7927 Folkestone Light Grey
RAL (7047)

F2255 Polar White
RAL (9010)

F5374 Elegant Oak

F5150 American Walnut

Our planters are supplied with thermo-plastic removable liners which can be easily planted by your plant specialist. The liners are modular, so it is as easy to mix and match the plants as it is with the furniture.

We can also supply artificial plants, but not without trying to persuade you to go for real plants first!

The low table maintains the most open and flowing lounge seating arrangement. The medium table aligns with the seat and creates a side table for a notepad or to recharge your phone. The high table or armrest creates separation for a greater seating density.

Plinth A solid plinth is available in black laminate

Sled base

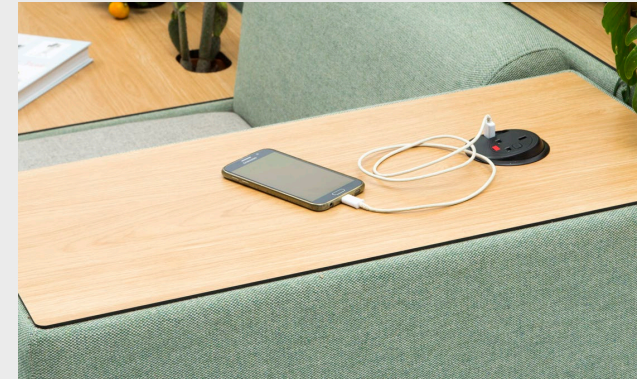

Powder coated: grey, white or black.

Castors

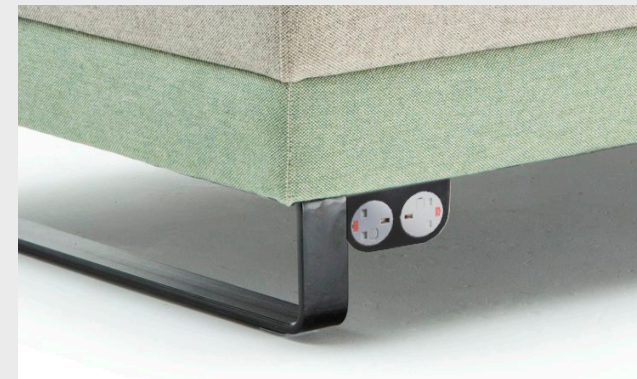

Two out of four per locking units.

Power

Power units can be fitted to seating, screens and table elements, but not planters. We work with a UK manufacturer OE electrics on our power solutions.

We recommend Pixel units and Arc80 wireless chargers for tables (surface-mounted), phase units for seating (under-mounted) and Puma for screens.

ADDITIONS | Coffee tables

Height options:

Coffee table 360h
Side table 600h

Mycroft

MCTR

For more informal settings, the Mycroft table provides side and coffee table options.

Mycroft

MCTO

Solid Oak, either natural oiled or stained black, is a great tool to soften a setting.

ADDITIONS | Side tables

Height options:

Coffee table 480h
Side table 600h
Dining table 740h

Disc

DSDC-700

The tables from our Laser and Disc range partner well with Studioscape. Disc with a flat base is best when the table is relatively fixed.

Laser

LSDQ-700

Laser (with a cruciform base) is better for pulling up close to you when seated, particularly on the triangular laptop table.

Production
100% Made in the UK

Frame
FSC Certified Timber and Birch Plywood frame

Upholstery
CMHR foam over webbing

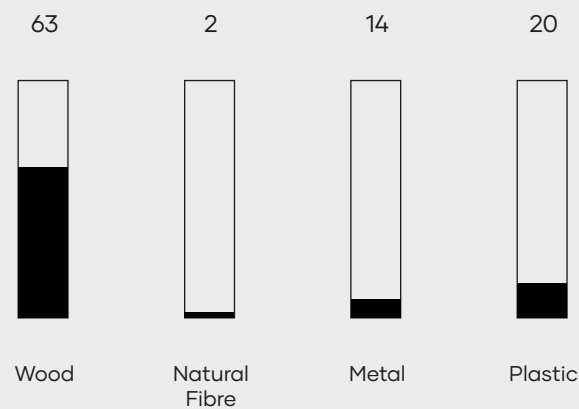

Base
Steel

Surfaces
Compact Laminate

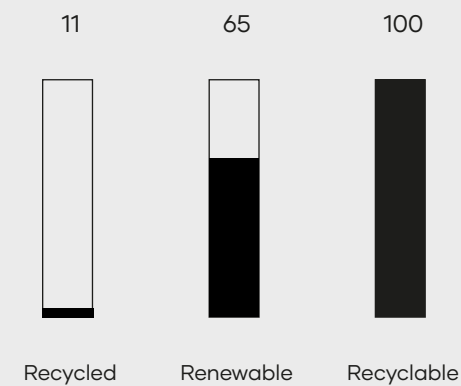

An Environmental Product Declaration (EPD) is available for this range. Despite its deep cushions, Studioscape is a wooden-framed product so it has a high percentage of natural and renewable materials.

"Producing furniture that we can confidently stand by in terms of the ethics and values of its production and lifecycle are a driving force for us."

FOUNDERS

MARK Product was founded by designers Anna Hart and John Miller with a vision to produce great UK-made furniture as sustainably as possible.

"We created MARK intending to be sustainable and we hold ourselves to the highest possible standards. Producing furniture that we can confidently stand by in terms of the ethics and values of its production and lifecycle are a driving force for us."

Anna Hart and John Miller met in 2007 through their shared aspirations of designing and making furniture that would not only enhance the experience of the place where people work but also deliver a difference to the lives of the community and environment where that product was made.

The ideas and values that Anna and John exchanged in their first meeting remain what drives the company today.
